# How to wash and care for your tee

Keep it soft and in shape for years with a few simple steps.

Updated November 17, 2026 ·

## Washing

1. Turn the tee inside out.
2. Machine wash at 30°C with similar colors.
3. Use a mild detergent, and skip bleach and fabric softener.

## Drying

- Do not tumble dry. Heat can shrink the cotton and weaken the recycled polyester.
- Reshape it while damp and dry it flat or on a hanger, out of direct sun.

## Ironing

- Iron on low heat, inside out.
- Don't iron over prints.
